

GENERAL SUPPLIES FOR CAMPBELL COLLEGIATE STUDENTS

1. Mask
2. Hand Sanitizer
3. Water Bottle
4. Graph paper – individual sheets or a notebook of graph paper
5. Ruler
6. Protractor
7. Compass
8. Loose-leaf
9. Binder (s)
10. Pencils, erasable pens
11. Pens – any colour
12. Dividers
13. Highlighters
14. Eraser
15. Sticky Notes
16. Indoor runners for Phys. Ed.
17. **APPROVED Scientific Calculator** – it is important to note that many common calculators will **NOT** be permitted to be used at Campbell. It is very difficult to produce a complete list as companies continue to change & add new models, but following is a list of ways to check to see if the calculator you have is not allowed. If you are still unsure as to the acceptability of a calculator after reading this list, please have the student bring in the calculator unopened in its original packaging and check with the math teacher to see if it needs to be returned and replaced with a different model.

a) if the calculator contains any of the following descriptions in it's name, it will NOT be allowed to be used in our math classes

- **Write View**
- **Mathprint**
- **MultiView**
- **Natural Display**
- **Textbook Display**

b) Enter $\sqrt{8}$ and check the answer. If the only answer it will give is $8 \sqrt{2.828427125}$, the calculator is likely fine. If one possible answer is $8 \square 2\sqrt{2}$, do **NOT purchase that calculator for use at Campbell**

- c) Do not purchase any calculator whose buttons show small squares that represent positions where numbers will be entered (like the following picture)

- d) Students will NOT be permitted to use their phone as a calculator
- e) Graphing Calculators are not permitted. The exception to that rule is that they will be allowed for portions of AP Calculus 30 and Foundations 30, but students will also require a scientific Calculator for most chapters.
